

In the specification:

Please replace the paragraph beginning at page 12, line 23, with the following rewritten paragraph:

Useful organolithium reagents can be defined by the formula $R^{11}Li$, ~~Rohm & Haas HSP Seeds~~ ~~Rohm & Haas HSP Seeds~~ where R^{11} is a hydrocarbyl group as defined above. The preferred hydrocarbyl groups are alkyl groups containing 1 to about 6 carbon atoms. The preferred organolithium compound is *n*-butyllithium, which is readily commercially available.
